#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. Claims 1-2 have been examined (including amendments to both the specification and drawing as filed 9/14/05).

#### ***Drawings***

The drawings are objected to because Figure 1 of both original and amended drawing as filed 9/14/05 is labeled "1/16" where only 15 drawings are disclosed; therefore suggested that the label be corrected to read as "1/15".

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawings should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyoshi et al. (5,493,455) in further in view of Kulakowski et al. (5,303,214).

As per claims 1-2, Miyoshi et al. teaches a tape drive apparatus comprising a storage cassette, itself comprising a mass storage media and a distinct management memory; within which said apparatus may store and/or retrieve either content and/or management data which may itself conditionally determine the access, interpretation, and/or content of either, and/or their likely validity based upon the constancy between the information stored within their corresponding storage areas (see figures, column 1 lines 56-67, column 2 lines 33-51, column 3 lines 9-26 and 43-47, column 5 lines 4-11, and column 12 lines 42-44); but does not teach that the said management memory may contain ~~may contain~~ an identifier unique to said cassette, nor that it may be further utilized as the basis of determining said consistency between the information stored in said management memory and that stored within said storage media. However Kulakowski et al. teaches that a unique identifier may be utilized to uniquely identify a cassette (see figure 27, Discussion of Prior Art column 1-2 lines 42-54, and column 6 lines 32-40). It would be obvious to one of ordinary skill in the art

Art Unit: 2186

at the time of the claimed invention to combine that taught by Miyoshi et al. with that taught by Kulakowski et al. relevant to the claims, for the benefit of enabling a tape drive apparatus to uniquely identify said cassette by utilizing a unique identifier stored within either its said management memory or said storage media, and/or to verify the consistency between the two by comparing such identifiers if correspondingly stored within both.
